EDUCATION

The University of North Carolina at Chapel Hill, *Chapel Hill, NC* May 2026

B.S. in Information Science; B.A. in Computer Science

- **Relevant Coursework:** Data Structures and Analysis, Information Retrieval, Practical Web Design and Development, Introduction to Database Concepts and Applications, Modern Web Programming, Information System Analysis & Design

Study Abroad: National University of Singapore (NUS), *Singapore* Fall 2025

- **Relevant Coursework:** Interaction Design, Introduction to Internet of Things

PROFESSIONAL EXPERIENCE

Front-End UI Developer - Locus Technologies, *Remote* June 2026 – Present

- Develop responsive web interfaces using HTML, CSS, JavaScript, and React, translating design concepts and wireframes into reusable, functional UI components.
- Debug and maintain front-end code using Git, improving application functionality, consistency, and reliability.
- Implement interactive UI elements and ensure cross-browser compatibility and responsiveness across devices.

RAPID Research Intern - Carolina Health Informatics Program, *Chapel Hill, NC* June – July 2025

- Conducted a mental health research project using Python and statistical methods to analyze Reddit posts, identify linguistic markers of emotional distress and visualize severity levels to support health equity initiatives.
- Designed an interactive Figma prototype for clinicians and moderators to visualize linguistic patterns and mental health severity trends, translating research findings into a human-centered support tool focused on health equity.

Resident Advisor – Carolina Housing, *Chapel Hill, NC* 2024 – 2025

- Planned and facilitated community-building programs that encouraged resident engagement, supported personal development, and fostered an inclusive residential environment across the community.

User Systems & Experience Analyst - UNC Chapel Hill, *Chapel Hill, NC* 2022 – 2024

- Redesigned academic presentation materials to improve visual hierarchy, clarity, and accessibility for diverse audiences.
- Supported and maintained classroom digital systems and user-facing software in clinical and academic healthcare environments, ensuring reliable and intuitive experiences.
- Collaborated with faculty and staff to identify workflow challenges and implement user-centered technical solutions.

PROJECTS

Prep4Class - Study Companion App | Prototype | UX Portfolio 2026

- Designed and prototyped an academic support app in **Figma** addressing student time management and motivation through structured AI Q&A, study scheduling, progress tracking, and reminders. Applied **information architecture, visual hierarchy, interaction design principles**, and intuitive navigation, documenting the UX design process in a portfolio.

With You – Mental Health Support App | Prototype | UX Portfolio 2025

- Designed a mobile application prototype in Figma that connects users with supportive peers and mental health resources. Conducted **user research** and **usability testing** to inform design decisions, focusing on **accessibility**. Developed interactive prototypes, user flows, and visual components that promote empathetic interactions and intuitive navigation, with the full **end-to-end design process** documented.

SymptomSync - Health & Wellness Dashboard | Live Demo 2025

- Developed a full-featured health and wellness web application using **CSS, JavaScript,** and **TypeScript**. Built an intuitive dashboard for tracking medications, appointments, and more. Designed and implemented **responsive UI components**, emphasizing usability and clear **data visualization** to support better personal health management.

InCompass - Internship Navigation Tool App | Prototype 2025

- Collaborated on a **team-based UX design** project to create a Figma prototype for an app that supports students applying for internships. Designed **user flows** and **wireframes** for features including portfolio creation, resume feedback, application tracking, and peer networking. Prioritized user needs and accessibility throughout the design process.

SKILLS

Design: UX Research, Interaction Design, Prototyping, Usability Testing, Information Architecture, Design Systems
Tools: Figma, Adobe Creative Cloud, Microsoft Office, VS Code, GitHub, Framer
Development: HTML, CSS, JavaScript, TypeScript, React, Tailwind CSS, Python
