EDUCATION

The University of North Carolina at Chapel Hill, *Chapel Hill, NC* May 2026

Information Science Major (B.S.), Computer Science Major (B.A.)

- **Relevant Coursework:** Data Structures and Analysis, Information Retrieval, Practical Web Design and Development, Introduction to Database Concepts and Applications, Modern Web Programming, Info. System Analysis & Design
- **Honors and Awards:** Hayden B Renwick Scholar Award, Social Justice Advocate of the Year Award

Study Abroad: **National University of Singapore (NUS)**, Singapore Fall 2025

- **Relevant Coursework:** Interaction Design, Introduction to Internet of Things

PROFESSIONAL EXPERIENCE

Front-End UI Developer - Locus Technologies, *Remote* June 2026 - Present

- Develop responsive web interfaces using HTML, CSS, JavaScript, and React, translating design concepts and wireframes into reusable, functional UI components.
- Debug and maintain clean, efficient code using Git, improving usability, consistency, and reliability across web applications.
- Implement interactive UI elements and optimize interfaces for cross-browser compatibility and device responsiveness.

RAPID Research Intern - Carolina Health Informatics Program, *Chapel Hill, NC* June - July 2025

- Conducted a data-driven mental health research project using Python and statistical methods to analyze Reddit posts, identifying linguistic markers of emotional distress and visualizing severity levels to support health equity initiatives.
- Designed an interactive Figma prototype for clinicians/moderators to visualize linguistic patterns and mental health severity trends, translating research findings into a human-centered support tool focused on health equity.

Resident Advisor – Carolina Housing, *Chapel Hill, NC* 2024 - 2025

- Designed and implemented engaging community programs that fostered meaningful connections among residents, while promoting resilience, values development, and a commitment to equity and inclusion across the community.

User Systems & Experience Analyst - UNC School of Government, *Chapel Hill, NC* 2023 – 2024

- Redesigned academic presentation materials to improve visual hierarchy, clarity, and accessibility for diverse audiences.
- Supported and maintained classroom digital systems, ensuring reliable, intuitive user experiences for faculty and students.

User Systems Support Specialist - UNC School of Dentistry, *Chapel Hill, NC* 2022 – 2023

- Supported user-facing software and technical workflows in a clinical and academic healthcare environment.
- Worked directly with faculty and staff to understand workflow pain points and provide user-centered technical solutions.

PROJECTS

Prep4Class - Study Companion App | Prototype | UX Portfolio 2026

- Designed and prototyped in Figma, an academic support app addressing student time management and motivation through structured AI Q&A, study scheduling, progress tracking, and reminders. Applied information architecture, visual hierarchy, interaction design principles, and intuitive navigation, documenting the **end-to-end UX design process** in a portfolio.

With You – Mental Health Support App | Prototype | UX Portfolio 2025

- Designed a mobile application prototype in Figma that connects users with supportive peers and mental health resources. Conducted **user research** and **usability testing** to inform design decisions, focusing on emotional safety and accessibility. Created interactive flows and visual components promoting calm, empathetic interaction and clear navigation, with the full **end-to-end design process** documented.

SymptomSync - Health & Wellness Dashboard | Live Demo 2025

- Developed a full-featured health and wellness web application using **CSS, JavaScript,** and **TypeScript**. The app enables users to track medications, appointments, and more through an intuitive dashboard. Designed and implemented responsive UI components, emphasizing usability and clear **data visualization** to support better personal health management.

InCompass - Internship Navigation Tool App | Prototype 2025

- Collaborated on a **team-based UX design** project to create a Figma prototype for an app that supports students applying for internships. Designed **user flows** and **wireframes** for features including portfolio creation, resume feedback, application tracking, and peer networking. Prioritized user needs and accessibility throughout the design process, delivering a practical tool for career development.

SKILLS

Design: UX Research, Interaction Design, Prototyping, Usability Testing, Information Architecture, Design Systems
Tools: Figma, Adobe Creative Cloud, Microsoft Office, VSCode, GitHub, Framer
Development: HTML/CSS, JavaScript, TypeScript, React, Tailwind, Python
